

STRAINSFORPAINS, INC. #10 DEC. 2019

STRAINSFORPAINS MAKES THE MEDICAL CANNABIS DECISION EASIER. WE EDUCATE THE MEDICAL SPECIALIST AND DISPENSARY, AS WELL AS THE CONSUMER, TO THE MULTIPLE STRAINS THAT ARE AVAILABLE FOR SPECIFIC PAINS OR AILMENTS.

THE STRAINSFORPAINS APP IS A USER BASED RECOMMENDATION APPLICATION THAT SCIENTIFICALLY DETERMINES WHICH CANNABIS BRAND OR STRAIN IS RIGHT FOR YOU, BASED UPON PERSONAL DATA AND STRAIN GENETICS.

UPDATE TO STRAINSFORPAINS APP TECHNOLOGY

THE STRAINSFORPAINS TRACKER APP, LAUNCH DECEMBER OF 2019, ALLOWS USERS TO ACTIVELY MONITOR THEIR PERSONAL PAIN MANAGEMENT FOR THEIR AILMENTS AS THEY ARE TREATED BY MEDICAL MARIJUANA. OVER 100 AILMENTS, AND 500 BRANDS AND LEVELS OF EFFECTIVENESS. OUR APP DETERMINES WHICH STRAINS ARE MORE EFFECTIVE FOR YOU.

THE APP COSTS ONLY 10.00. END USERS COMMUNICATE ADVANCED MONITORING AND MANAGEMENT ALLOW THE APP TO TRACK SYMPTOMS, TREATMENTS, IMPACT, HISTORY, DATA. AND REPORTS ON ALL OF THE DATA COLLECTED, ALLOWING DISPENSARIES, GROWERS, PHARMACEUTICAL COMPANIES, AND RESEARCHERS TO SHARE COMPREHENSIVE REPORTING.

OUR CONTINUOUS DATA IS A KEY FACTOR FOR THE APP AND ALLOWS UPDATES TO PATIENT AND GROUPS DAILY. WE HAVE ANALY ED THOUSANDS OF CLINICAL STUDIES.

THE COMPANY WILL SHOWCASE IT'S APP AT THE MJ BIZCON CONVENTION IN LAS BEGAS IN DECEMBER 2019.

THE COMPANY IS PUBLIC TRADING ON THE OTC MARKETS UNDER THE SYMBOL "EBYH". THE COMPANY HAS ACHIEVED POSITIVE REVENUES FOR THE FISCAL YEAR 2019.

“Our app will assist pain management professionals & dispensaries in making better choices for the consumer”

- Dr. B. Moorjani

Potential Therapeutic Uses of Medical Marijuana

Latest Info

Strainsforpains collaborating and sharing data with Mount Sinai Hospital physicians on pain management education. Data base considered to be up to 50,000 doctors.

Strainsforpains collaborating with University of Vermont on company data.

Company management to attend several medical cannabis shows in 2019. Management will speak and present at certain events.

While the majority of States in the US continue to impose a total ban on cannabis, there are 33 states which allow its use for medical purposes, and according to the developers of this APP the prohibition on cannabis "rapidly coming to a close". Major initiatives to expand medical cannabis are underway in New York, California and Florida. Several small cities are looking to become 'hubs' for this industry. Several other small cities have got out of debt by increasing their cannabis industrial base and workforce.

Strainsforpains has collaborated with major research facilities, like University of Vermont and New York Mount Sinai to further develop existing data sources and marketing. We have identified Thomas Jefferson University and Penn State as potential candidates for further joint efforts on our database and other research. Company management has associated with State University of New York(SUNY) in residencies related to cannabis education. The Company has entered into its public company stage and has brought on board industry experts as consultants. Strainsforpains, Inc. will have a booth at the MJ BizCon Convention in Las Vegas in December 2019.

Our company has initiated 'focus groups' to help us better target audiences, consumers, medical professionals, industry players, and third party service providers. Some of these professionals have been successfully persuading the media, politics, and industry on the harmful effects of opioids. Our company is also working with members of Veterans Affairs on these matters. We feel that our cutting edge technology will be instrumental in the help of veterans who suffer from many diseases including PTSD. Our company is committed in the fight against opioids, and look to prevent many thousands of deaths occurring on an annual basis in the US alone.

Our research and data has resulted in an APP, with hundreds of different strains available, each of which contains a combination of several cannabinoids of varying strengths. The complexity is increased when you consider that each strain reacts differently with your own "unique combination of cannabinoid receptors to produce medical, psychological, and, yes, recreational effects on the human body."

Our APP is initially aimed at what the developers call 'canna businesses' - those businesses such as cultivators and dispensaries who make their money from the legalization of cannabis. The APP will be available on a subscription basis to allow them to see what strains are most popular in particular areas and adjust their stock as necessary. The APP will follow through for free to consumers on a much broader scale. Mass internet advertising will generate traffic.
